Subject: Safeguarding Nuclear Power Plants

DOCKET NUMBER
PETITION RULE PART 73-12
(69 FR 64690)

Dear Secretary,

Since the advent of 9/11 I am particularly concerned about the safety of nuclear power plants from sabotage. I believe not enough has been done to safeguard and protect these plants from a deliberate terrorist attack by air or on the ground.

Please do all you can to upgrade and meet the threat that is posed by targeting a nuclear power plants. I believe more can be done, and it is criminal not to do everything possible to prevent a successful targeting of these plants. The dire consequences of not upgrading and protecting these plants from sabotage are terrible and quite frankly beyond my imagination. Please make it a national priority to protect these plants from such destruction.

The best approach, I believe, is to dismantle these plants and store the dangerous byproducts in highly safeguarded and guarded spot. If that is not done, then next at least safeguard them in a more rigorous fashion than they are now.

Randy Ziglar
