DOCKET NUMBER

PETITION RULE FROM 13-12  
(69FR 64690)

Dear Secretary,

Please upgrade the Design Basis Threat (DBT) for U.S. nuclear power stations by revising DBT regulations. They must require the NRC and the nuclear power industry to contemplate and prepare for an air attack on nuclear power stations by constructing shields consisting of (inexpensive and quick-to-assemble) steel I-beams and steel cabling to obstruct the angle of air attack at stand-off distances from the reactor building. They must also fuel pool and other safety-related assets so that hijacked, rented or private aircraft (potentially carrying explosives) attempting to deliberately crash into a reactor site would be torn up in the "Beamhenge" shield, thereby effectively reducing the impact and penetration force on safety-related structures. The shield effort is focused on reasonably reducing the public's risk of terrorists successfully using nuclear power stations for radiological-enhanced sabotage.

As a person living in a potentially-affected area of such nuclear plant disasters, I urge you to make these changes.

Sincerely,

Marsha Aronson  
91 Coldenham Road  
Walden, NY 12586-2011
