DOCKET NUMBER

PETITION RULE FROM

73-12
(69FR 64690)

Dear Sirs:

Do not wait, for any reason, to place high security in and around our nuclear reactors. They are highly dangerous. In fact, it would be better for our country (and the world) to use a much safer source of power, many of which are in active service already: wind, water, thermal.

Three years is way too long to fuss with 'paper work'. Be logical. Get your teams in the field NOW.

What is at stake? The lives of your children and their children, and mine, to say nothing of our very environment and way of life.

You are the people in charge. You will make a difference. Do it.

Sincerely,
Sarah Brownrigg, CA, USA, citizen
