Subject: House Bill 239

I got interested in Louisiana Energy Services because they were being inventive in what they told the people here in Lea County.

Then later I thought no parent should ever have to worry about their kid getting sick from the garbage the Les plant would put into the air.

That they should be able to play out in the front yard and their parents should not have to worry about them getting ill from LES contaminated soil.

If the NRC cannot guarantee that even one person will not get sick from the LES emissions, what good is their word to the 30,000 people who will live downwind of the plant?

Its worthless.

I urge all Congressmen to vote for the bill that would not allow state land to be used for storage of LES nuclear waste. I also urge you to pass one that would require anything to do with that plant to have zero radioactive emissions.

Zero Emissions.

A lot of New Mexicans are depending on you to do the right thing.

Phillip Barr
Lea County
