Subject: Re: Simple Question

Ray,

I sent the question with some background to Phil Qualls, too.

STP TS 6.8.1 requires that written procedures shall be established, implemented, and maintained for fire protection program implementation. The SER says that we reviewed the licensee's list of potential spurious actuations, that it seemed complete, and that actions to address these seemed simple and practicable (or similar words). It doesn't say that they will be in any procedure.

Neil:

Rebecca was looking over my shoulder as I read this.

They can't take manual actions in lieu of III.G.2 but they have approval from NRR. Did the SER that approved the OAL discuss the use of procedures?

That's all we can think of now. It must be a violation of some criteria.]

Ray

Rebecca and Ray,

Any ideas?

Neil
