SUBJECT License Amendment Request 3 - request for proprietary withholding			

SUMMARY (Continue on Page 2)

NRC called to inform Holtec that the staff has made a determinatiuon that the information submitted in LAR 1014-3 to the Holtec HI-STORM 100 storage design that was requested to be with held as proprietary does not meet the requirements of 10 CFR 2.390. Specifically Holtec had requested the entire supplemental information package that comprised the new material for staff review be with held from the public. The supplmental material contained information that is generic in nature and already readily available to the public. As such the request for withholding will be denied. Holtec was offered two options 1) to allow the information be released to the public or 2) the withdrawal of the submittal from staff review with the option to resubmit the information with a new proprietary review and request for withholding. Holtec indicated they will request that the existing submittal be withdrawn from staff review. A new submittal will be submitted.

Also on the phone call were Brian Thomas - acting Deputy Director For the Licesning and Inspection Directorate of SFPO and Meraj Rahimi (SFPO PM for Holtec HI-STAR activities)
