Subject: Status of response to request for additional information		
Summary: NRC letter dated January 12, 2005, requested additional information to support a license amendment. The letter requested a response be submitted in 30 days or we would assume that they did not wish to pursue the application. I spoke with Justin Douthat and he said that the individual who needs to review the changes in the application has been on vacation. He will followup and try to get it sent out by the end of next week.
