Janice Owens  
US NRC Licensing Officer  
11555 Rockville Pike  
Rockville, MD 20852

Dear Ms. Owens,

Westinghouse would like to amend our Waste License, XW003, which is for the export of uranium contaminated scrap metals to Mississauga Metals & Alloys, Inc. in Canada. Westinghouse wishes to amend the expiration date to December 31, 2015 and to add to the face of the license 910,000 lbs of scrap steel and metal contaminated with 7 Kgs U235 contained in a total of 165 Kgs of Uranium. The steel is from our Hematite facility. Everything else on the License remains unchanged.

A check for \$1,900 is enclosed for this amendment request. Please contact me if you have any questions on this matter.

Very truly yours,

*Edward J. McDonough*
