Mr. Phillip Jerman
Materials Licensing Section
Nuclear Regulatory Commission
531 Park Avenue
King of Prussia, Pennsylvania 19406

Dear Mr. Jerman:

In reference to your recent conversation with Dr. Wade Miller concerning the radioactive materials license for St. Mary's Hospital, Orange, New Jersey, the radium sources that I use for calibrating my survey meter are traceable to the National Bureau of Standards, they are licensed under New York City license 78-1 and were purchased from Radium Chemical Co. Also, Dr. Miller will be using radioactive material in a capsule form, not liquid when administering therapeutic forms of radioactive material as per his license application.

Sincerely,

David S. Marsden, Ph.D.

DS1/rm
