Nuclear Regulatory Commission

69FIR71854

Nuclear Regulatory Commission:

How can you even think about building new reactors when we don't even have a place for the waste that we have? Even if Yucca Mountain is built, - and that's not a certainty - that facility will only hold the waste that is currently in existence.

Nuclear energy must be phased out, not revived. The only reason nuclear energy is cheap is because of the Federal subsidies that the nuclear industry receives. I'm all for free trade, but this is Corporate Welfare. Get ready for opposition. The people are getting informed, and they're pissed!

Sincerely concerned,

Donna Cassano
