

Water Resources

Data Category: Geographic Area:

The nwis.waterdata.usgs.gov server is currently experiencing some network and database connectivity problems. We are actively working on resolving this issue, however, all real-time data continues to be available at <http://waterdata.usgs.gov/nwis>.

Real-Time Data for Connecticut

Daily Streamflow Conditions

Select a site to retrieve data and station information.

Explanation

- High
- ≥ 90th percentile
- 75th - 89th percentile
- 25th - 74th percentile
- 10th - 24th percentile
- < 10th percentile
- Low
- Not ranked

The colored dots on this map depict streamflow conditions as a percentile, which is computed from the period of record for the current day of the year. Only stations with at least 30 years of record are used. The gray circles indicate other stations that were not ranked in percentiles either because they have fewer than 30 years of record or because they report parameters other than streamflow. Some stations, for example, measure stage only.

Statewide Streamflow Table

Real-time data typically are recorded at 15-60 minute intervals, stored onsite, and then transmitted to USGS offices every 1 to 4 hours, depending on the data relay technique used. Recording and transmission times may be more frequent during critical events. Data from real-time sites are relayed to USGS offices via satellite, telephone, and/or radio and are available for viewing within minutes of arrival.

All real-time data are **provisional and subject to revision.**

Build Table	Build a custom summary table for one or more stations.
Build Sequence	Build a custom sequence of graphical or tabular data for one or more stations.

#
# USGS NWISWeb site number list
#
# This file can be used to retrieve data from the
# USGS NWISWeb internet based retrieval system using
# the 'File of site Numbers' search criteria.
#
# This file can be edited, but the number of columns
# must be equal for each row, and the 'site_no' column
# must remain.
#
# The columns include:
# agency_cd -- Agency code. If no value is found, 'USGS' is assumed
# site_no -- USGS site number
# station_nm -- USGS site name. This column is include for viewing only,
# it is not used by the nwisweb system.
