Subject: Renewal Application			
<p>Summary:</p> <p>The license authorizes use of portable gauges. The licensee's renewal application references procedures in NUREG 1556, Volume 4 (guidance for fixed gauges), instead of the procedures in Volume 1, Rev. 1. I called the licensee to request a new application that references correct applicable procedures. Ms. Pedersen was not available and Ms. Juanita answered the phone. I gave her our web address to get to volume 1 of the NUREG, and gave her my name and telephone number if Ms. Pedersen wants to call me back. I told her that a completed application may be faxed to DNMS, and gave her our fax number</p>
