I believe we are finally getting to the home stretch on this one. These are the last items we need to address:

1. Provide the names of the physicians that will be supervising the use of the Yttrium 90 (for the Zevalin procedure).
2. The Strontium 90 eye applicator will be listed as a separate line item on your license. Therefore, I will need a possession limit for that source.
3. Provide the names of authorized users for the Strontium 90 and Cesium 137 calibration sources .
