Licensee/Applicant Participant(s):	Organization:	Telephone No.:	
Jeffrey Geesaman, RSO	Valley Quarries, Inc.	717 267 2244	
Person(s) Calling: Sattar Lodhi			
Subject: Storage Locations			
<p>Summary:</p> <p>The licensee requested change in storage location and addition of three other address where licensed material may be stored. I called the licensee to discuss the locations with respect to security and control of the storage locations.</p> <p>The RSO stated that the new storage location at 169 Quarry Road is within their property and is secure with locks and remains under the their control. Similarly, the other locations are also within the premises of the properties under their control and are secure. He also stated that the storage locations will be appropriately posted.</p> <p>He asked me if it will be o.k. to move the gauges to new location now. I told him that he should wait until he receives the amended license that includes the new locations of storage. I told him that before moving the gauges from their current storage locations, they must ensure that the areas are free of contamination. He stated that they never had any incident of any gauge leaking while in their possession. I told him that they must maintain records of leak tests to demonstrate that they released storage location was free of any radioactive contamination.</p>			
Action Required/Taken: Document
