Subject: NRC license amendment request for New Britain General Hospital, mail control 136346

Reference: New Britain General Hospital, 06-02388-01, 03001250, mail control 136346

To: George Pavlonnis

Please provide the following additional information regarding the amendment request to add an Authorized Medical Physicist and new hot lab. Please fax your response within 30 days to 610-337-5269, referencing mail control 136346. You may address any questions to me by e-mail.

Please confirm that you have received this message.

1) For Leticia A. Salinas, provide a copy of the transcript from her M.S. degree in Health Physics from Texas A&M University. In addition, the preceptor statement provided was not signed (Part II, Item 12). Please resubmit this with the signature of a preceptor authorized medical physicist. Because Daviid Wishko is listed as the supervising individual in Part I, Items 8 and 9, you may wish to ask him to complete Part II, Item 12.

2) For the new hot lab, provide the scale of the drawing, building name and room number (if applicable), summary of material that will be stored in this location, and description of any shielding. We will issue an initial amendment adding this location of use to your license. Upon receipt of closeout surveys, we will then remove the old hot lab from your license.

3) Regarding the new hot lab, your request states: "...This location will also be the address of the High Dose Rate (HDR) source material." Is 5 Highland Street the address where the HDR will be both stored and used? Is this the street address that corresponds to your drawings submitted on Feb. 23, 2004 as part of your original request to add HDR? At that time, you requested the address of HDR use to be 100 Grand Street. Do you now wish to change that request? Please clarify.

Thanks for your help.

Sandy Gabriel
Senior Health Physicist
Medical Branch
