Supplement to License Amendment Request (LAR) to Revise the Spent Fuel Pool Criticality Analyses and Technical Specifications (TS) 3.7.17, "Spent Fuel Pool Storage" and 4.3, "Fuel Storage"

By letter dated February 1, 2005, Nuclear Management Company (NMC) submitted an LAR to revise the spent fuel pool criticality analyses and Technical Specifications (TS) 3.7.17, "Spent Fuel Pool Storage" and 4.3, "Fuel Storage". The February 1, 2005 submittal included Exhibit D, Westinghouse Electric Company Calculation CN-WFE-03-40, "Prairie Island Units 1 & 2 Spent Fuel Pool Criticality Analysis" which is identified on each page as "Westinghouse Proprietary Class 3". This document is releasable to the public and thus was not submitted under the provisions of Title 10 Code of Federal Regulations Section 2.390. However, some confusion regarding document releasability may be created by the Proprietary Information paragraph near the bottom of the Calculation cover page. The enclosure with this letter provides a replacement cover page which does not include the Proprietary Information paragraph. NMC submits this supplement in accordance with the provisions of 10 CFR 50.90.

The proposed changes in this supplement do not impact the conclusions of the Determination of No Significant Hazards Consideration and Environmental Assessment presented in the original February 1, 2005 submittal.

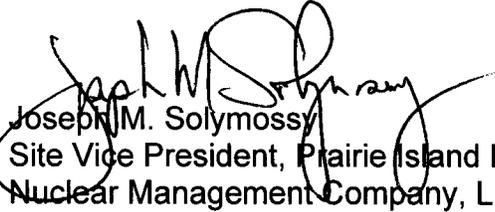

In accordance with 10 CFR 50.91, NMC is notifying the State of Minnesota of this LAR supplement by transmitting a copy of this letter and enclosure to the designated State Official.

Summary of Commitments

This letter contains no new commitments and no revisions to existing commitments.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on FEB 22 2005
