Re: Comments on Draft NUREG-1811

To Whom It May Concern:

I am writing to OPPOSE granting an Early Site Permit (ESP) to Dominion Resources to build two new reactors at the North Anna nuclear plant in Mineral, VA. The draft Environmental Impact Statement states that construction activities permissible under the ESP may stir up heavy metals and other contaminants in the lake sediment, while details about mitigation measures are murky.

Further, other effects on the lake, such as temperature increases and reduced water levels, are not fully analyzed. Finally, questions about the adequacy of current security regulations and performance are ignored, as are issues of waste generation and its safe, permanent isolation.

Nuclear power has proven a dangerous way to go. Increased threat of terrorism and the possibility of catastrophic accident should all be considered before the U.S. Nuclear Regulatory Commission decides to build more nuclear power plants. Too many questions remain unanswered and too many problems remain unsolved for the NRC to grant an ESP at North Anna.

Sincerely,

Lauren Agrella
Charlottesville, VA
