MAY@nrc.gov

Subpart J: Proposed Changes

- Proposed rule published November 26, 2003 (68 FR 66372). Comments period ends January 12, 2004.

Proposed rule addresses five areas:

- Filing requirements and format standards for a party's submissions to the electronic docket for the HLW licensing proceeding
- Secretary of the Commission's determination that the DOE license application is electronically accessible
- Loading of duplicate documents on individual Licensing Support Network (LSN) website servers
- Continuing obligation of LSN participants to update their documentary material
- Material that may be excluded from the LSN

Subpart J: Proposed Changes Submissions to Electronic Docket

- 10 CFR § 2.1001: Definitions for three types of documents added:
 - Complex document -- consists "entirely or in part" of electronic files having substantial portions that are neither textural nor image in nature (e.g., runtime executable software, viewer or printer executables, dynamic link library (.dll) files, large data sets associated with an executable, actual software code for analytical programs)
 - Large document -- consists of electronic files that are larger than 50 megabytes
 - Simple document -- consists of electronic files that are 50 megabytes or less

Subpart J: Proposed Changes Submissions to Electronic Docket (cont.)

- Proposed 10 CFR § 2.1013(c)(1) requires all filings be transmitted as follows:
 - “Simple documents” must be transmitted electronically via the NRC Electronic Information Exchange (EIE) [§2.1013(c)(1)(i)]
 - “Large documents” must be transmitted electronically via EIE in multiple transmissions of 50 megabytes each [§2.1013(c)(1)(ii)]

Subpart J: Proposed Changes Submissions to Electronic Docket (cont.)

- Portions of "Complex documents" amenable to electronic submission must be transmitted electronically. Portions not amenable to electronic transmission must be delivered on optical storage media which includes the complete document (including portions transmitted electronically via EIE) [§2.1013(c)(1)(iii)]
- Electronic submission must have 300 dots per inch (dpi) as the minimum resolution for bi-tonal, color resolution, and grayscale resolution [§2.1013(c)(1)(iv)]

Subpart J: Proposed Changes Submissions to Electronic Docket (cont.)

- Electronic submissions must be generated in appropriate PDF output format by using [§2.1013(c)(1)(iv)]:
 - PDF-Formatted Text and Graphics for textual documents converted from native applications
 - PDF-Searchable Image (Exact) for textual documents converted from scanned documents
 - PDF-Image Only for graphic, image, and forms-oriented documents. Tagged Image File (TIF) images and the results spreadsheet applications must be converted to PDF, except in those rare instances where PDF conversion is not practicable

Subpart J: Proposed Changes Submissions to Electronic Docket (cont.)

- Electronic submissions must be free of hyperlinks to other documents or websites, but electronic submissions to the hearing docket may contain hyperlinks within a single PDF file, if those links are created using PDF authoring software
[§2.1013(c)(1)(vi)]
- Electronic submissions must be free of author imposed security restrictions
[§2.1013(c)(1)(vii)]

Subpart J: Proposed Changes Determination of Electronic Accessibility

- 10 CFR § 2.1012(a) revised to specify that the Secretary's determination of electronic accessibility would be based on whether the DOE license application could be effectively accessed through the Commission's Agencywide Documents Access and Management System (ADAMS), rather than the electronic hearing docket
- 10 CFR § 2.1013(a)(2) revised to delete the reference to the electronic docketing of the license application and the Secretary's determination that the license application can be accessed via the Commission's electronic docket rules

Subpart J: Proposed Changes LSN Responsibilities: Documentary Material

- 10 CFR § 2.1003(a)(1) revised to allow LSN participants to forego loading a document already made available by the LSN participant who created the document (or on whose behalf a document was created)
- Note:
 - Full scope of “reliance” information may be apparent only after contention admission. With few exceptions, disputes would await that time
 - Commission expects LSN participants to exercise good faith efforts to make such documents available via LSN before their initial certification date

Subpart J: Proposed Changes LSN Responsibilities: Doc. Material (cont.)

- 10 CFR § 2.1003 - added requirement that an LSN participant supplement documentary material made available under § 2.1003(a) in its initial certification with documentary material produced after that event
- 10 CFR § 2.1005, "Exclusions" - added another category for material excluded from the requirement to provide electronic access, either pursuant to §2.1003, or through derivative discovery pursuant to §2.1019(i):
 - "(i) Correspondence between a potential party, interested governmental participant, or party and the Congress of the United States"
