Plant Manager  
Mount Athos Road Facility  
P. O. Box 11646  
Lynchburg, VA 24506-1646

Dear Mr. Freeman:

The Nuclear Regulatory Commission recently issued two documents which provide insights into NRC's strategies in accomplishing our mission. I am sending them to you, your licensing manager, site security officer and public affairs officer for information.

The first document, "Protecting Our Nation Since 9-11-2001," describes efforts undertaken by the NRC and its licensees to enhance the already robust security of the nation's nuclear power plants following the terrorist attacks of September 11, 2001. It provides a detailed description of the enhancements that have been made during the past three years, including increased security patrols, augmented security forces, additional security posts, increased vehicle stand-off distances, and improved communication with law enforcement and intelligence communities, as well as strengthened safety-related mitigation procedures and strategies.

The second document, NRC's "Strategic Plan FY 2004 - FY 2009," describes the NRC's strategic direction by defining the agency vision, goals, outcomes and strategies we intend to pursue. It reflects a new recognition of the importance of physical security and emergency preparedness as contributors to plant safety, and describes how the agency intends to meet its strategic goals in a manner that we believe is comprehensive and clear.

I hope you will find these useful.

Sincerely,

**/RA/ L. Plisco for**

William D. Travers  
Regional Administrator
