Jerry Dozier
Office of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Washington, DC 20555-0001

SUBJECT: MATERIAL FOR UPCOMING LICENSE RENEWAL WORKSHOP

Dear Mr. Dozier:

Enclosed is a copy of a report titled, "U.S. Nuclear Plants in the 21st Century: The Risk of A Lifetime." UCS issued this report in May 2004. This report is publicly available, for viewing or downloading, on our website at http://www.ucsusa.org/clean_energy/nuclear_safety/page.cfm?pageID=1408.

I plan on referring to this report during my presentation at the license renewal workshop next month. To help NRC staff members and external stakeholders attending the workshop access the information in this report, I respectfully request that you arrange for this document to be placed in the publicly available portion of the NRC's ADAMS. UCS did copyright the report, but the NRC has our permission to make the report available via ADAMS without restrictions.

Sincerely,

David Lochbaum
Nuclear Safety Engineer
Washington Office

Enclosure: As stated
