

Withholding Criteria

- SECY-04-0191
 - Provides Background & General Approach
 - Details provided in Attachment 1 regarding criteria for deciding on release/withholding of power reactor related information
 - Most Information continues to be released

SECY-04-191

- Examples of released information
 - General Information (e.g., no plant specific information)
 - Plant information such as location, general design information
 - Traditional licensing basis information (without detailed layouts)
 - Risk Information (unless providing new or temporary plant weaknesses)

SECY-04-191

- Examples of withholding information
 - Detailed layout drawings
 - Real-time vulnerabilities, plant configurations
 - Security/Threat Related (ROP, training, etc.)
 - Documents designated sensitive by other federal agencies (DOT, FERC, EPA)
 - Pipelines
 - Electrical transmission system
 - Hydro-electric dams

Examples - Release

Examples - Release

- Most Design/Licensing Basis Information
 - FSAR schematics
 - FSAR analyses
- Most Risk-informed documents (w/ caution)
 - IPE
 - Risk-informed licensing decisions
 - ASP

Examples - Withhold

Recent Issues

- Additional information identified related to materials licensees
- Commission decided to bring down ADAMS public library (PARS)
- Documents easily identified as being NRR/reactor related restored (i.e., files with a Part 50 docket number in profile)
- Efforts underway to restore documents without a docket number in profile

Interaction with NRC

- Regulatory basis for withholding information is 10 CFR 2.390(d)
- Used in the past by some licensees for documents related to security but not safeguards information
- Similar to proprietary information in terms of redactions and markings
 - “Withhold from public disclosure under 10 CFR 2.390”
- Does not require affidavit

Internal Controls

- Issues raised about control of information by licensees
 - Internal Controls
 - Control by vendors, contractors, and other 3rd parties
- Need to assess existing controls

Moving Forward

- NRC to issue RIS
- NRC to create page on Web site
- Topic likely to be discussed at upcoming workshops regarding designation guidance for safeguards information
- Need to integrate into routine processes
