U. S. Nuclear Regulatory Commission  
Attn.: Document Control Desk  
Washington, D.C. 20555

Reference: Docket No. 50-285

**SUBJECT: Duration of Relief Request for Previous Repair of Pressurizer Nozzle (TAC No. MC0196)**

The purpose of this letter is to revise the duration of the proposed alternative request submitted by Omaha Public Power District (OPPQ) in Reference 1 (see attached Reference List).

OPPQ originally requested relief for the duration of the Fort Calhoun Station operating license. However, as noted in References 5 and 7, OPPQ is replacing the pressurizer in 2006. Thus, the duration of the requested alternative should be until the affected pressurizer is removed from service during the 2006 Refueling Outage.

No commitments to the NRC are made in this letter. If you have any questions or require additional information, please contact Thomas C. Matthews at (402) 533-6938.

Sincerely,

D. J. Bannister  
Manager – Fort Calhoun Station

DJB/mle
