

U.S. NUCLEAR REGULATORY COMMISSION		DATE: February 23, 2005
TELEPHONE OR VERBAL CONVERSATION RECORD		TIME: 4:02pm
PARTICIPANTS: Don Cammarata	ORGANIZATION: Burle Industries, Inc.	PHONE NUMBER: 717-295-6696
LICENSE NO. 37-30196-01	DOCKET NO. 03033750	MAIL CONTROL NO. 136011
SUBJECT: Additional Info needed for sealed sources and facilities and equipment		
<p>SUMMARY:</p> <p>I returned a call to Don Cammerata, The RSO for the licensee. He wanted to inform me that he sent a fax to my attention based on a previous conversation I had with Dr, Carraciolo, who was acting for Mr. Cammerata in his absence.</p> <p>I previously asked for a statement confirming material receipt and accountaablitiy and a complete listing of authorized users. Dr. Cammerata explained that all of the authorized users will remain on the license. I then asked for clarification b/c all AU's on the current license were not listed in the renewal application. He stated that he would like to add more AU's. I explained to him that if any AU's not currenty on the license are added, documentation of training would have to be submitted also. I also informed him that others are allowed to use the materials under the supervision of an AU. I explained to Mr. Cammerata that a renewal supercedes the current commitments and once the review is complete, a renewed license will be issued. He explained that he was not aware of that as this was the first time they renewed. He then confirmed that those NOT listed in the renewal application or on the fax sent should be removed from the license and he will not be adding any new users at this time.</p>
