

U.S. NUCLEAR REGULATORY COMMISSION		Conversation Date	2/22/05
<b>TELEPHONE CONVERSATION RECORD</b>		Time	3:50 p.m.
Mail Control No.:	License No.:	Docket No.:	
136263	37-30385-01	030-34422	
Licensee/Applicant Participant(s):	Organization:	Telephone No.:	
James Wilhelm, Supervisor/RSO	Penn. Soil & Rock, Inc.	412 292 8489	
Person(s) Calling: Sattar Lodhi			
Subject: New Storage location & Leak tests			
<p>Summary:</p> <p>The licensee submitted a request to change storage location of its gauges. The letter stated that the drawings of the new storage location are attached. However, the attachments were not included with the letter. I called the RSO to request the missing information (this request was to get the documentation complete, otherwise the licensing guidance does not require these drawings). During our conversation he confirmed that they have already moved the gauges to new location and the previous storage location was remodeled.</p> <p>I informed him that regulations require that areas of use be not release for unrestricted use until the NRC has authorized their release. I asked him that this requirement is to ensure that the areas are free of contamination before they can be released for unrestricted use. I asked him if they ever had any incident of gauge damage in the previous storage area and if any of the gauges stored there had any leaking source.</p> <p>He stated that there was no damage to the gauges while they were stored there nor there was ever any leaking source. He also promised to fax the missing drawings.</p>			
Action Required/Taken: Document/ finalize licensing action
