

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION III  
2443 WARRENVILLE ROAD  
LISLE, ILLINOIS 60532-4352

FEB 18 2005

Jennifer Hann Fisher, M.S.  
Radiation Safety Officer  
Memorial Hospital  
615 North Michigan Street  
South Bend, IN 46601

Dear Ms. Fisher:

Enclosed is Amendment No. 52 to your NRC Material License No. 13-18881-01 in accordance with your request. Please note that some of the changes made to your license are printed in **bold font**.

Please be sure that you understand all conditions. If there are **any errors** or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

At this time I was unable to complete my review of the radionuclides, manufacturer's names and model numbers for all sealed sources you possess or intend to possess under 10 CFR 35.400 and 35.500. The Sealed Source and Device Registry (SSDR) database was experiencing technical difficulties and I could not complete my review. When the SSDR is restored, I will complete my review and issue a corrected copy of your license listing the sources after verification.

Please note, however, that you did not provide the radionuclides, manufacturer's names and model numbers for all sealed sources you possess or intend to possess under 10 CFR 35.500. If you no longer wish to continue this authorization, please contact me at (630) 829-9841 or (800) 522-3025 to discuss the information we will need to remove this authorization from your license.

If you do wish to continue the authorization for materials in 10 CFR 35.500, please provide the radionuclides, manufacturer's names and model numbers for all sealed sources you possess or intend to possess under 10 CFR 35.500. Please reference control number 313935 (different from the previous control number I advised you of) and address it to my **attention**.

Please note that on October 25, 2004, the NRC suspended public access to ADAMS, and initiated an additional security review of publicly available documents to ensure that potentially sensitive information is removed from the ADAMS database accessible through the NRC's web site. Interested members of the public may obtain copies of the referenced documents for review and/or copying by contacting the Public Document Room pending resumption of public access to ADAMS. The NRC Public Document Room is located at NRC Headquarters in Rockville, MD, and can be contacted at 800-397-4209 or 301-415-4737 or [pdrr@nrc.gov](mailto:pdrr@nrc.gov).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

J. Fisher

2

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Colleen Carol Casey  
Materials Licensing Branch
