

U.S. NUCLEAR REGULATORY COMMISSION		Conversation Date: Feb 25, 2005	
TELEPHONE CONVERSATION RECORD		Time: 1100	
Mail Control or Report No. 136331	License No. 45-30991-01	Docket No. 03036826	
Licensee/Applicant Participant(s): Brenda Smith, Office Manager Richard Brown, Consultant	Organization: Blue Ridge Card. Associates	Telephone No. 540-829-4374 724-625-7520	
Person(s) Calling: Todd Jackson			
Subject: New license app deficiencies			
<p>Summary:</p> <p>I called because essentially all necessary information was missing from the application package. Brenda Smith referred me to Mr. Brown, who had prepared the application and he called me back. He described what should have been in the package and appeared to know what information was necessary, however it had not been in the application package submitted by Blue Ridge CA, Inc. Mr. Brown was going to gather the missing information and submit the entire package. I provided him a pdf copy of the submitted application package, including a drawing. I also stated that some additional info on the drawing would be helpful, including an indication of scale, room numbers, what was outside the outer wall of the camera room (he said it was the operating room storage room), what floor of Culpeper Hospital this was located on (second), and whether any other NRC licensee would be using the facilities (he said only this licensee would be using the facilities).</p>			
Action Required/Taken: Awaiting submittal of additional information for application package.
