Subject: Release of Non-ISFSI Site Land - FSS Final Report No. 8

On March 15, 2004, Maine Yankee submitted a request for amendment (Reference No. 4) to the facility operating license (Reference No. 1) pursuant to 10 CFR 50.90 and in accordance with the NRC Approved License Termination Plan (LTP) for Maine Yankee (Reference No. 2), to indicate NRC's approval of the release of the Non-ISFSI site land from the jurisdiction of the license. In support of that request, Maine Yankee supplied the information required in LTP section 1.4.2 and 5.9.3. The land area associated with the license amendment request included the entire non-ISFSI portion of the site land. Maine Yankee is submitting the required dismantlement and survey information for the survey units that make up the non-ISFSI portion of the site land in a phased fashion. Accordingly, Maine Yankee is herewith supplying the dismantlement and survey information for eight survey areas comprising twelve survey units. Other descriptive information and technical evaluations contained in Reference No. 4 are unaffected by these revisions and are, therefore, not included in this submittal, as indicated.

Attachment I - Final Status Survey Final Report No. 8, provides dismantlement and summary survey information for the survey units covered in this submittal and the revised schedule for the submittal of the remaining dismantlement and survey information. Attachment II provides a copy of the revised, supporting final status survey release records for the survey units that make up the eighth phase of survey information.

Maine Yankee requests timely review and acceptance of this dismantlement and survey information by April 29, 2005, in accordance with the NRC review schedule transmitted to Maine Yankee on February 9, 2005, and in accordance with the NRC review schedule agreements developed in the September 9, 2004 and January 5, 2005 NRC - Maine Yankee management meetings.
