

ATL TEAM

PERSONAL COMMUNICATION NOTES

DATE: 9/29/2004 TIME: 10:30am PROJECT TITLE: LES EIS for NM

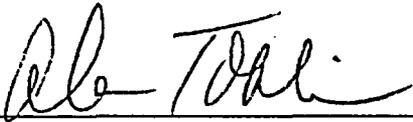

BETWEEN: Ghassan Musharrafieh OF: New Mexico State Engineers Office

LOCATION: Santa Fe, NM TELEPHONE No.: 505.827.6110

AND: Alan Toblin of ATL Team (the caller) TELEPHONE No.: 301-353-9464

DISCUSSION:

I am working with ATL International as contractors to the Nuclear Regulatory Commission. We are evaluating a license application from Louisiana Energy Services to build an enrichment facility in Lea County, NM. One of the contentions to the application is that the facility's water use could have a noticeable impact on lea county water availability over the operating life of the facility. As part of my evaluation of this contention I would like to apply your numerical model of the lea county groundwater basin in determining the effect of facility operation on basin water levels. I would appreciate your sending me a copy of the model and associated documentation.
