Mr. Daniel J. Malone
Site Vice President
Palisades Nuclear Plant
Nuclear Management Company, LLC
27780 Blue Star Memorial Highway
Covert, MI 49043-9530

SUBJECT: ANNUAL ASSESSMENT LETTER - PALISADES NUCLEAR POWER PLANT
(REPORT 05000255/200501)

Dear Mr. Malone:

On February 8, 2005, the NRC staff completed its end-of-cycle plant performance assessment of the Palisades Nuclear Power Plant. The end-of-cycle review for Palisades involved the participation of the reactor technical divisions in evaluating performance indicators (PIs) for the most recent quarter and inspection results for the period from January 1 through December 31, 2004. The purpose of this letter is to inform you of our assessment of your safety performance during this period and our plans for future inspections at your facility so that you will have an opportunity to prepare for these inspections and to inform us of any planned inspections that may conflict with your plant activities.

This performance review and enclosed inspection plan do not include physical protection information. A separate letter designated and marked as "Exempt from Public Disclosure in accordance with 10 CFR 2.390" will include the physical protection review and resultant inspection plan.

Overall, the Palisades operated in a manner that preserved public health and safety and fully met all cornerstone objectives. Plant performance for the most recent quarter was within the Licensee Response Column of the NRC's Action Matrix, based on all inspection findings being classified as having very low safety significance (Green) and all PIs indicating performance at a level requiring no additional NRC oversight (Green).

While plant performance for the most recent three quarters was within the licensee response column of the Action Matrix, plant performance for the first quarter (01/01/04 - 03/31/04) was in the Regulatory Response Column of the Action Matrix. This was based on one White inspection finding in the Initiating Events Cornerstone that was identified in the second quarter of 2003. The White inspection finding was closed based upon a satisfactory completion of Inspection Procedure (IP) 95001 Supplemental Inspection, "Inspection For One Or Two White Inputs In A Strategic Performance Area," in March 2004.

The enclosed inspection plan details the inspections, less those related to physical protection, scheduled through September 30, 2006, including inspection of your independent spent fuel storage facility. The specific dates of these inspections will be coordinated with your staff.

The inspection plan is provided to minimize the resource impact on your staff and to allow for scheduling conflicts and personnel availability to be resolved in advance of inspector arrival onsite. Routine resident inspections are not listed due to their ongoing and continuous nature. The inspections in the last nine months of the inspection plan are tentative and may be revised at the mid-cycle review meeting.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be made available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

If circumstances arise which cause us to change this inspection plan, we will contact you to discuss the change as soon as possible. Please contact Eric Duncan, Chief, Reactor Projects Branch 6 at (630) 829-9628 with any questions you may have regarding this letter or the inspection plan.

Sincerely,

/RA/

Robert M. Lerch, Acting Chief
Reactor Projects Branch 6
Division of Reactor Projects
