Chief,

I herewith voice my opposition to the proposal for expanding the North Anna Power facility in Louisa County with two new nuclear reactors. Although our population is growing, future anticipated electrical power demands can be met with more judicious per capita consumption and development of smaller distributed electrical generation plants using alternative energy sources. The risks of nuclear facilities to the health, safety, and welfare to the public and environment far outweigh any benefits. Granting permit for new facilities, especially in a fast track manner, is deemed most irresponsible for a government agency that should be working for the public's interest.

Respectfully,
