Sir:

I would like to protest your scheduling a vital public meeting on operations at the Millstone nuclear plant without adequately notifying the residents who would be effected if an accident should happen. I read the New York Times every day. No notice was published. It looks like you didn't want anyone to know there was a meeting. It is my understanding that the Nuclear Commission in the State of Connecticut have no plans for notification of residents who reside in a ten to fifty mile radius in the event of a nuclear malfunction. A plan for evacuation of this area is vital. Without a plan for viable evacuation, the plant should be shut down.
