Subject: Authorized material on license			
<p>Summary:</p> <p>I noted that the licensee possesses gauges that may not contain Cf-252 (Item 6.C.). I also noted that the application dated September 19, 2000, did not request the material. I called the RSO to verify which gauges they possess and if any of them contains Cf-252.</p> <p>The RSO stated that they possess 3241C, 3411B and 4640B gauges and they do not have any gauge that contains Cf-252. He also stated that in the past few gauges were transferred to their office in Texas and one of these gauges may have contained Cf-252.</p> <p>I told him that we will remove authorization for Cf-252 and that they must maintain records of transfer of gauges for our review during inspections.</p>
