Glen Allen, Virginia 23060-6711

SUBJECT: SURRY POWER STATION, UNITS 1 AND 2 - RESPONSE TO GENERIC LETTER 2004-01, "REQUIREMENTS FOR STEAM GENERATOR TUBE INSPECTIONS" (TAC NOS. MC4857 AND MC4858)

Dear Mr. Christian:

On August 30, 2004, the NRC staff issued Generic Letter (GL) 2004-01, "Requirements for Steam Generator Tube Inspections" to the industry. The purpose of this generic letter was to obtain information that would enable the NRC staff to determine whether a licensee's steam generator (SG) tube inspection program complies with the existing tube inspection requirements (the plant technical specifications in conjunction with Title 10 of the *Code of Federal Regulations*, Part 50, Appendix B).

By letter dated October 29, 2004, Virginia Electric and Power Company (VEPCO) provided its response to GL 2004-01 for Surry Power Station, Units 1 and 2. After reviewing VEPCO's response, the NRC staff did not identify any concerns with the inspection practices related to GL 2004-01 that are employed at Surry. Therefore, the NRC staff concludes that VEPCO's SG tube inspection practices related to GL 2004-01 are in compliance with the existing SG tube inspection requirements.

If you have any questions regarding this matter, please contact Stephen Monarque at (301) 415-1544.

Sincerely,

*/RA/*
