Chairman: NILS J. DIAZ
U.S. NUCLEAR REGULATORY COMMISSION
WASHINGTON DC. 20555-0001

I am writing to inform you that I am against Dominion Power obtaining a permit to expand Nuclear Energy Operations in my state of Virginia.

Nuclear Energy is harmful to our environment, the radioactive waste produced by nuclear energy is harmful, not only to us but future generations.

I promise to fight Dominion Power, the US Nuclear Regulatory Commission, The Bush Administration and all Energy "FAT CATS" in this country from building anymore potentially dangerous and contaminating reactors in the United States. The People will be heard!

I urge you to be wise for future generations & promote Conservation, SOLAR & Wind alternatives.

Thank you for your time.

William J. Vestig
