2443 WARRENVILLE ROAD
LISLE, ILLINOIS 60532-4352
FEB 08 2005

Mary Hacker
Radiation Safety Officer
Washington County Memorial Hospital
911 North Shelby
Salem, IN 47167

Dear Ms. Hacker:

Enclosed is Amendment No. 08 to your NRC Material License No. 13-26497-01 in accordance with your request. Please note that the changes made to your license are printed in a **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

This also refers to the request made in your letter dated November 5, 2005, received November 15, 2004, to decrease the frequency of your Radiation Safety Committee meetings. Please be advised that your licensed program no longer meets the criteria mandating a Radiation Safety Committee in 10 CFR 35.24(f). Pursuant to 10 CFR 35.24(f) and 10 CFR 35.10(e), "Implementation," you are no longer subject to provisions requiring a Radiation Safety Committee. If you have further questions about this matter please contact me at (630) 829-9841 or (800) 522-3025.

Please be advised that your license expires at the end of the day, in the month, and year stated in the license. Unless your license has been terminated, you must conduct your program involving byproduct materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Notify NRC, in writing, within 30 days, pursuant to 10 CFR 35.14:
 - a. **When the Radiation Safety Officer permanently discontinues performance of duties under the license or has a name change; or**
 - b. **When the mailing address listed on the license changes.**
3. In accordance with 10 CFR 30.36(b) and/or license condition, notify NRC, promptly, in writing, and request termination of the license when a decision is made to terminate all activities involving materials authorized under the license.
4. Request and obtain a license amendment before you:

- a. Change Radiation Safety Officers, except as provided in 10 CFR 35.24©);
 - b. Order byproduct material in excess of the amount, or radionuclide, or form different than authorized on the license;
 - c. Add or change the areas of use or the address or addresses of use identified in the license application or on the license, pursuant to 10 CFR 35.13(e), 10 CFR 35.13(f) and 10 CFR 35.14(b)(4); or
 - d. Change ownership of your organization.
5. Submit a complete renewal application or termination request at least 30 days before the expiration date of your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of byproduct material after your license expires is a violation of NRC regulations. A license will not normally be renewed, except on a case-by-case basis, in instances where licensed material has never been possessed or used.

In addition, please note that NRC Form 313 requires the applicant, by his/her signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for an application for medical use must be the licensee's management, as required by 10 CFR 35.12(a).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Please note that on October 25, 2004, the NRC suspended public access to ADAMS, and initiated an additional security review of publicly available documents to ensure that potentially sensitive information is removed from the ADAMS database accessible through the NRC's web site. Interested members of the public may obtain copies of the referenced documents for review and/or copying by contacting the Public Document Room pending resumption of public access to ADAMS.

M. Hacker
