Subject: clinton power station

I believe we need to develop our nuclear generating capacity. It is vital to our national energy policy and our security. We must reduce our reliance on fossil fuel in order to provide a energy source for our future.

The current operators of the Clinton station has proven the ability to operate the station reliable and safely. Overall the nuclear industry produces more power with fewer health problem than any other fossil fuel source. Even with a major accident as in Three Mile Island, very little impact is felt by the surrounding population.

Please consider continuing the permit process with out undo delay,

Thank you

Harry Borrenpohl P.E.
