Dear ESP Decision Makers:

I am against new power plants, including at North Anna, because of unresolved waste disposal issues.

Plutonium 239, a major constituent of irradiated spent fuel from nuclear power plants, has a half life of 24,400 years, and is harmful to living tissue for 250,000 years, or 12,000 human generations.

Contemplating intentionally leaving a legacy of harm for 12,000 human generations, in exchange for a small amount of electricity for 1 or 2 generations now, is unkind and unreasonable.

Please reconsider.

Thank you.

Sincerely,

Adele Wood
