Re: License Number 47-25351-01 63034021

To Whom It May Concern:

Please amend our materials license to reflect the following change:

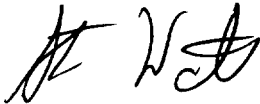

A. Add the following physician authorized users to our NRC license as authorized users for materials identified in 10 CFR 35.200. Documents verifying clinical training are attached for reference.

After thoroughly reviewing this individuals work, credentials, and work history, I certify by my affixed signature that these individual have achieved a level of competency sufficient to function independently as authorized users of materials identified in 10 CFR 35.200.

1. Richard Goldman, M.D.
2. Brad Angeja, M.D.
3. Jack Flyer, M.D.
4. Paul Aggarwal, M.D.

Thank you for your attention to this matter.

Sincerely,

Steven Walter, M.D. RSO
Authorized User
General Manager and CEO

NMSS/RGNI MATERIALS-002

Seth D. Bilazarian, M.D., F.A.C.C.
One Parkway, Haverhill, MA 01830

12/1/2004

Dear colleague,

I am an Authorized User listed on the Radioactive Materials License of MedCath Inc., license number 67-0459. This communication is to confirm that Richard Goldman, M.D. has successfully completed all training requirements set forth by the Nuclear Regulatory Commission guidelines section 35.290, paragraph c (1). He has achieved the level of competency sufficient to function independently as an authorized user for the medical uses authorized under the NRC guidelines 35.100 and 35.200.

Dr. Richard Goldman has completed 700 hours of training and experience in basic radionuclide handling techniques applicable to the medical use of unsealed by product material for imaging and localization studies. This training experience included a minimum of the following:

A. 1) classroom and laboratory training in the following areas:

- a) radiation physics and instrumentation
- b) radiation protection
- c) mathematics pertaining to the use and measurement of radioactivity
- d) chemistry of byproduct material for medical use
- e) radiation biology
- f) generator elution

2) work experience under the supervision of authorized user Seth Bilazarian M.D., which meet the requirements in 35.290, involving:

- a) ordering, receiving and unpacking radioactive materials safely and performing the related radiation surveys
- b) calibrating instruments used to determine the activity of doses and performing checks for proper operation of survey meters
- c) calculating, measuring, and safely preparing patient or human research subject dosages
- d) using administrative controls to prevent a medical event involving the use of unsealed byproduct material
- e) using the procedures to safely contain spilled radioactive material and using proper decontamination procedures
- f) administering dosages of radioactive drugs to patients or human research subjects
- g) eluting generator systems appropriate for preparation of radioactive drugs for imaging and localization studies, measuring and testing the

eluate for radionuclidic purity, and processing the eluate with reagent kits to prepare labeled radioactive drugs

B. In addition, Dr. Richard Goldman has completed training in the clinical aspects of nuclear cardiology, which has included the following:

1) interpretation of over 500 patients studies

- a) review of over 200 myocardial perfusion scans with angiographic correlation
- b) preparation of nuclear radiopharmaceuticals
- c) camera quality control, set up and calibration
- d) patient preparation, dose administration
- e) scanned acquisition and processing
- f) interpretation and reporting results of exams

I am pleased to confirm that Dr. Richard Goldman has achieved the level of competency sufficient to function independently as an authorized user for medical uses authorized under the NRC guidelines 35.100 and 35.200.

Sincerely,

Seth D. Bilazarian, MD

Re: Amendment Letter Dated 11/30/2004 License Number: NRC 47-25351-01

To Whom It May Concern:

In order to clarify the submitted documentation to add Drs. Angeja and Flyer to our license as authorized users, I would add the following in conversion of the months listed in their fellowship training documents to actual contact hours:

1. Brad Angeja, MD has completed at least 700 hours of training and experience in basic radionuclide handling techniques applicable to the medical use of unsealed byproduct material for imaging and localization studies. This training and experience included a minimum of the following:

A. 1) 50 hours of classroom and laboratory training CFR 35.290 (c) (1)(i) in the following areas:

- a) Radiation physics and instrumentation;
- b) Radiation protection;
- c) Mathematics pertaining to the use and measurement of radioactivity;
- d) Chemistry of byproduct material for medical use;
- e) Radiation biology
- f) Generator Elution

2) 10 hours of work experience under my supervision CFR 35.290 (c) (ii) (A-E) involving:

- a) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;
- b) Calibrating instruments used to determine the activity of dosages and performing checks for proper operation of survey meters;
- c) Calculating, measuring, and safely preparing patient or human research subject dosages;
- d) Using administrative controls to prevent a medical event involving the use of unsealed byproduct material;
- e) Using procedures to safely contain spilled radioactive material and using proper decontamination procedures;
- f) Administering dosages of radioactive drugs to patients or human research subjects; and
- g) Eluting generator systems appropriate for preparation of radioactive drugs for

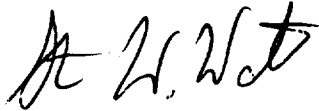

imaging and localization studies, measuring and testing the eluate for radionuclidic purity, and processing the eluate with reagent kits to prepare labeled radioactive drugs

B. In addition, Dr. Angeja has completed 640 hours during fellowship (4 months) CFR 35.290 (c)(ii)

training in the clinical aspects of Nuclear Cardiology, which has included the following:

- a) Interpretation of nuclear medicine studies.
- b) preparation of nuclear radiopharmaceuticals
- c) camera quality control, set up and calibration
- d) patient preparation, dose administration
- e) scan acquisition and processing

Steven W. Walter, M.D.

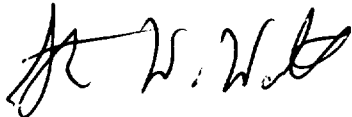

Authorized User/RSO

2. Jack Flyer, MD has had 700 hours of training as required by CFR 35.290 and is competent to practice independently as an authorized user.

- a. 50 hours of classroom and laboratory training CFR 35.290 (c) (1)(i)
- b. 960 hours of training during fellowship training CFR 35.290 (c) (1)(ii)

Please let me know if you have any additional questions.

Sincerely,

Steven W. Walter, MD

Dear Dr. Walker:

I am an authorized user listed on the Radioactive Materials License of the Regents of the University of California, license number CA192353A-38. This communication is to confirm that Brad Angeja, M.D. has successfully completed the subset of clinical training requirements set forth by the Nuclear Regulatory Commission guidelines section 8835.290, paragraph c (1).

Dr. Angeja has completed a minimum of four months training under my supervision. Specifically, he has completed training in the clinical aspects of Nuclear Cardiology which included the following:

1. Interpretation of approximately 50 patient studies with catheterization correlation.
 - a. Review of over 35 myocardial perfusion scans with angiographic correlation
 - b. Patient preparation, dose administration
 - c. Scan acquisition and processing
 - d. Interpretation and reporting results of exams.

Sincerely,

A handwritten signature in black ink, appearing to read "E. Botvinick".

To Whom It May Concern:

This letter is to certify the training of Jack Flyer, MD in the subspecialty of nuclear cardiology. I served as director of the Nuclear Cardiology Laboratory at New York Hospital/Cornell Medical Center from 1996-1997. During that time, Dr. Flyer was an advanced fellow in cardiology. As part of his core training in cardiology, he completed eight weeks of nuclear cardiology training in the first two years of his fellowship prior to my arrival at Cornell. He then trained for four additional months under me with an average daily caseload of 12 perfusion studies and two radionuclide angiograms during that time. He has satisfactorily completed the clinical component for licensure but still needs to complete the didactic portion. Once this component is satisfied, he is eligible to take the certifying examination offered by the American Society of Nuclear Cardiology

Please contact me if there are any questions regarding Dr. Flyer's nuclear cardiology training.

Sincerely,

Timothy F. Christian, MD
Professor of Medicine and Radiology
Co-Director, Cardiac MR

February 2, 2005

Dear Sir/Madam,

I am an Authorized User listed on the Radioactive Materials License of Capital Cardiology Associates, P.C., (New York State Agreement Authorized User License Number 3186). This communication is to confirm that Dr. Paul Aggarwal has successfully completed all training requirements set forth by the Nuclear Regulatory Commission guidelines section §35.290, paragraph c (1). Dr. Paul Aggarwal has achieved a level of competency sufficient to function independently as an authorized user for the medical uses authorized under the NRC guidelines 35.200.

Dr. Paul Aggarwal has completed 1250 hours of training and experience in basic radionuclide handling techniques applicable to the medical use of unsealed byproduct material for imaging and localization studies. This training and experience included a minimum of the following:

- A. 1) Classroom and laboratory training in the following areas:
 - a) Radiation physics and instrumentation;
 - b) Radiation protection;
 - c) Mathematics pertaining to the use and measurement of radioactivity;
 - d) Chemistry of byproduct material for medical use;
 - e) Radiation biology
 - f) Generator Elution
- 2) Work experience, under the supervision of authorized user(s), Dr. Mark Tallman, MD which meet the requirements in §§ 35.290, involving:
 - a) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;
 - b) Calibrating instruments used to determine the activity of dosages and performing checks for proper operation of survey meters;
 - c) Calculating, measuring, and safely preparing patient or human research subject dosages;
