Subject: *E.I. du Pont de Nemours and Company, Inc.; Request for Additional Information Concerning Application for Amendment to DuPont Experimental Station site License (No. 07-00455-02), NRC Control Number 136053.*

Dear Betsy,

03003252

I am responding to your telephone request for additional information regarding the application for an amendment to the DuPont Experimental Station site NRC License (No. 07-00455-02).

Based on our recent telephone conversations and additional internal discussions, we have decided not to pursue the amendment request to change the current Type A broad scope license to a Type B broad scope license. We will retain the current Type A license. We do wish to continue to pursue the additional changes as noted in our letter dated February 8, 2005.

Please contact me if you have any additional questions or comments regarding this submittal.

Sincerely,

Michael B. Ohm
Radiation Safety Officer, Stine-Haskell Research Center (License #07-13441-02) and Industrial Hygiene Technologist, Stine-Haskell Research Center
