(31)

Gentlemen: It is very upsetting to learn that you are considering relicensing the Millstone plant with all the negative considerations that has:

1. Millstone has been operating an expired clean water act permit for a full 5 years beyond the allotted time.
2. The Millstone operation depletes the native fish population due to ineffective intake methods
3. There is no plan in existence for a safe evacuation from Long Island in spite of the fact that it is 11 miles away. Shoreham was shut down for just that reason.

How can you be thinking of this? Millstone must be shut down. Dont fool with our lives!

Yours truly
Constance K. Case
