Subject: Millstone Nuclear plant in CT

Greetings,

I am a resident of Connecticut and I am writing to you to strongly urge you to deny the renewal of the license for this plant. There are significant health concerns associated with this plant that merit immediate investigation. Also, the State of Connecticut has enacted legislation that mandates a move to Clean, Renewable energy (referred to as Class I renewable). This plant does not meet this criteria. The denial of this extension would go a long way to improving the health and environment of Ct as well as exepiting the move to Clean Energy.
I am sure that you have received many requests similar to this one; please look at the facts and make the right decision. What decision would you make if you lived next door to this plant? Reject this application for the sake of the residents, specifically the children of CT and of planet Earth.
