Subject: Millstone Nuclear Plant

My husband and I live in Greenport NY and are seriously opposed to the relicensing of Millstone. It is and has been what its name portends, a millstone around the neck of all who live on the eastern end of Long Island. There is no way we can be safely evacuated, should there be a problem, the communications of warnings between the states seem to be nearly non-existent and this plant is functioning with an expired clean Water discharge permit for over 4 years time. Long Island Sound is dying and the NRC and EPA seem to care very little for the welfare of the people who consume the fish and shellfish that have managed to survive this long. Our rates of cancer have drastically increased in recent years and someone needs to address the fact that Millstone can be a serious contributor to the food chain poison we consume and breath.

Please do not relicense this plant until it is able to pass all CURRENT permit requirements such as the Clean water discharge permit and the health issues and evacuation route of Eastern Long Island are satisfiably addressed.

We live and work here, our lives are no less important than those of the citizens of Connecticut who receive their power from this plant. Make it safe or close it down.
