RE: Comments on Draft NUREG-1811

Dear Ms Williamson,

We are writing to voice our dismay at the prospect of the granting of an ESP for two new nuclear reactors at the North Anna, Virginia site.

Specifically, we fail to understand why the NRC is not considering the security implications of new plants post 9/11, especially in light of the fact that the nation's capital, a highly symbolic terrorist target, is often downwind of North Anna.

As residents of nearby Charlottesville, we already feel vulnerable to the possibility of a catastrophic accident (if these plants are so safe, how come the private insurance industry won't take on the risk of insuring them?) We resent the use of our tax dollars to prop up an otherwise unprofitable enterprise, and respectfully remind the NRC that they are public servants whose number one priority is, or should be, the safety of the public.

Sincerely

Pete Marshall, Minamihara  
Leah Marshall, LPA (4)
