Subject: Point Beach Nozzle 26 Relief Request

Attached is the licensee's ASME section III relief request for the tack weld on the j-groove.

After your review, I would like to get an e-mail confirming your authorization for granting relief verbally. This authorization would address the previously requested relief for nozzle 26 under section XI as well as the previously mentioned section III item. Of course, please let me know if there are any technical concerns that the Licensee needs to address.
