Subject: Re: Fwd: SAFETY EVALUATION FOR POINT BEACH NUCLEAR PLANT UNIT 1, SUPPLEMENTAL ADDITION TO RELIEF REQUEST MR 02-018-2 FOR CRDM REMNANT J-GROOVE WELD REPAIR OVERLAP (TAC NO. MC3221)

Dale:

I discussed that with Harold Chernoff this morning and the DLPM issuance, (or transmittal), may not occur until next week.

As a result, we will need to delay our closure memo from going forward into the concurrence chain until we obtain the publicly available Adams number assigned to DE's safety evaluation..

In Frank's absence, I will modify the closure letter and maintain control of the concurrence package in our file until DLPM issues the SE to PBNP.

Thanks,
Joe

>>> Dale Thatcher 06/21/04 01:36PM >>>

I don't think we can use this June 17 SE document as a reference in the allegation closure as you have proposed -It is not publicly available. We need to reference the Projects issued public document.

>>> Joseph Petrosino 06/21/04 11:18AM >>>

Frank:

Because you gave me back the closure letter draft so quickly, I just wanted to ask you whether you made sure that the SE and the parts which I quoted in the close out letter appropriately address or resolve concern 2. Actually, the same question goes to DE's input that is in the closure letter for Concern 1....

Thanks,
Joe
