Subject: Language for Reg. Guide 3.71 reference

As we discussed in our call this afternoon, the sentence reflecting the guidance in the upcoming revision to Reg. Guide 3.71 is as follows:

"In addition, the details of validation should state computer codes used, operations, recipes for choosing code options (where applicable), cross sections sets, and any numerical parameters necessary to describe the input." This should be reflected in your NCS Program commitments in Chapter 5 of the SAR.

"Also, by [DATE], LES will provide NRC with a revised validation report that meets LES' commitment to ANSI/ANS-8.1-1998, including that the details of validation should state computer codes used, operations, recipes for choosing code options (where applicable), cross sections sets, and any numerical parameters necessary to describe the input." This should be reflected in your NCS Program commitments in Chapter 5 of the SAR. Guidance on the details of meeting this commitment can be found in the 10 CFR Part 70 Standard Review Plan (NUREG-1520-2002), Section 5.4.3.4.1(8).
