SUBJECT: CORRECTION OF LICENSE AUTHORITY FILES FOR FARLEY
NUCLEAR PLANT, UNITS 1 AND 2 (TAC NOS. MC3231 AND MC3232)

The purpose of this memorandum is to provide you with the information necessary to update the license authority files for the subject plant and units to accurately capture the license and technical specification changes made to these documents. We have completed the review of the license authority files for Farley Nuclear Plant, Units 1 and 2, comparing the two NRC copies and the licensee's records to determine corrections that are necessary. Attachment 1 provides those changes that are needed to the copy of the license authority files maintained by your staff for its use. Attachment 2 provides those changes that are needed to the copy of the license authority files maintained by your staff for use by the Office of Nuclear Reactor Regulation (NRR). Changes needed to the licensee's records will be addressed under separate correspondence to the licensee.

Included in each of the attachments are copies of the (1) coverpage(s) of the letters(s) transmitting the license amendments(s) or correction letter(s); (2) insert/remove instruction page(s) for incorporating the correct page(s); and (3) correct license and/or technical specification page(s). Please follow the instructions of the insert/remove pages when incorporating these corrections. Please have a member of your staff coordinate the replacement of the pages in the copy of the authority file maintained for NRR use with me. I can be contacted at 301-415-1842.
