Mike,

For Cindy Pederson's site visit, she would like participate in the following activities:

1) Accompany me on an ISI inspection activity in the plant (if possible). If the schedule works out I could take her in to see the vessel head (walk on the head) or pressurizer surge line weld examinations. Please check to see if I can escort Cindy because she wont have time to take protected worker or fall protection training.

2) If it does not work out for me to take Cindy into containment for ISI observations, she would like you to take her in and also to give her a general plant tour.

3) She would like to meet with the plant manager and site vice president.

Cindy's Schedule - She will fly into Green Bay and arrive at about 11:30 am on Thursday (probably on-site by 1:00 pm). She will fly out at 2:55 pm on Friday. She would like to have at least a 2.5 hrs margin to make her departure flight.

Thanks Mike!
