Please provide an update on your response. I have not received a reply from you on these questions.

Thank you.

I have reviewed your request and determined that some changes need to be made to your license to meet current NRC Region I licensing policy as follows:

1. Your license had previously listed several Radiation Safety Officers (RSO) , however, NRC only recognizes one RSO as responsible for a licensed program. Duties of the RSO may be delegated but only one RSO is responsible and listed on the license. Please confirm that you are the RSO to be listed.
2. Your license had previously included research and development under Conditon 9.A. through E. This is not normally part of nuclear pharmacy license authorization. Please clarify and /or indicate if this should be removed from license authorizations.
3. Subitem 7.J. of your license indicates the form any , however, it seems sealed sources should be the correct form. Please clarify.

You may reply by facsimile to 610 337 5269 and refer to Mail Control 136276.

Thank you in advance.
