SUBJECT: Materials License Renewal (#45-15253-03)

030-19653

Andrea,

As discussed, we are using RSO, Inc. of Laurel Maryland to perform calibrations on our radiation monitoring equipment. RSO is licensed to perform this service through the state of Maryland, Department of the Environment, license # MD 33-021-01. Although we have, in the past, been calibrating our equipment on a semi-annual basis, we will be moving to calibrate on an annual basis. The Ionizing Radiation Program documentation that I forwarded to you on 10/24/97 will be revised to reflect this change.

We have multiples of all our radiation monitoring equipment, and their calibration dates are staggered to ensure a calibrated instrument is always available for use.

Please contact me at the phone number / address above if there are any questions.

Sincerely,

Michael J. Heffernan
Radiation Safety Officer
